Supported Customers

Curleidos International

Supply Chain Management & Logistics Information Systems

Domain Expertise

Military Command and Control & Decision Support Systems

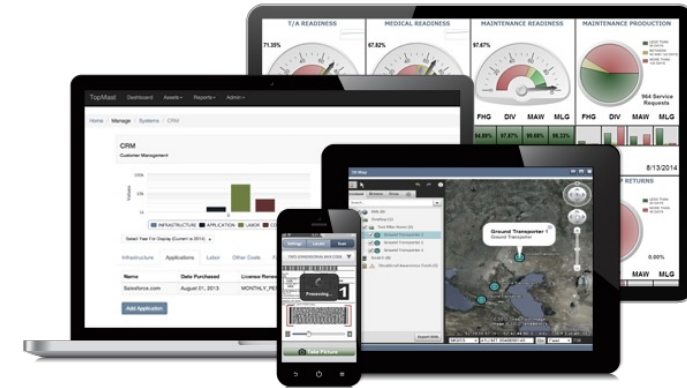

Service Offerings

- ✓ Software Development
- ✓ Systems Modernization
- ✓ Cyber Security
- ✓ IT Portfolio Management

Products

- ✓ Total Visibility Anywhere - *Asset Visibility*

Tactical Edge Service Offerings

Customized solutions that foster efficiency and reduce costs, including:

- ✓ Software Development
- ✓ Systems Modernization
- ✓ I.T. Portfolio Management
- ✓ Cyber Security

Services: Software Development

Secure, Scalable and Durable Solutions that Power Business

We couple diverse technical and domain expertise with Software Development Lifecycle (SDLC) best practices, tools, and effective Agile processes to provide customer-centric, cost-effective solutions on time and on budget.

BENEFITS

- ✓ Proven Track Record of Engineering Complex Enterprise Systems Deployed on a Global Scale
- ✓ Scalable, Secure, Multi-platform Solutions Customized to your Organization's Business Needs
- ✓ Mobile Solutions that leverage Best-of-Breed Technologies for Rapid Deployment
- ✓ 100% Project Transparency and Near Real-Time Access to Project Status

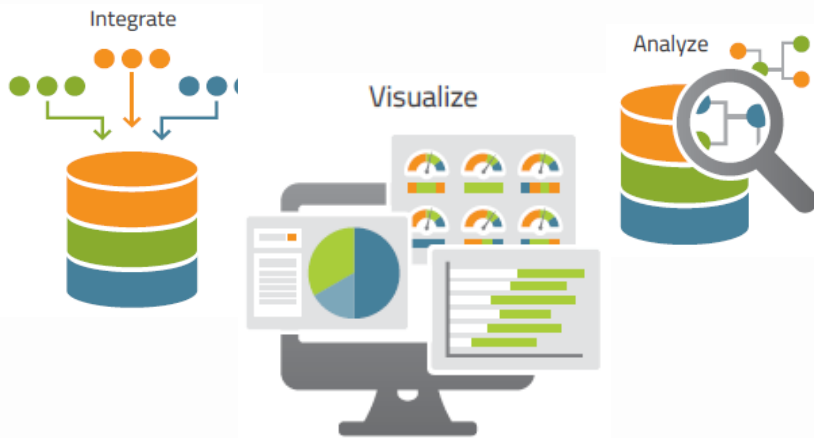

Services: Software Development

Secure, Scalable and Durable Solutions that Power Business

We Harness Technical Expertise in the Following Areas to Produce Effective Solutions:

Analytics and Business Intelligence

- Define Information Requirements
- Identify and Integrate Data Sources
- Analyze Data and User Stories
- Deploy Intuitive Visualizations

Geospatial Technologies

- Data Model Optimization
- Geo Reference Data Model
- Geospatial Event Processes
- Analysis and Analytics

Fault Tolerant Messaging

- Subscription Management
- Intelligent Data Caching
- Optimal and Dynamic Routing
- Message Priority and Chunking

Services: Software Development

Secure, Scalable and Durable Solutions that Power Business

We Harness Domain Specific Experience in the Following Areas to Produce Effective Solutions:

Logistics & Supply Chain Management Systems Solutions that Drive Productivity

- Inventory Control and Reporting
- RFID, Transponder Sensor, and Data Integration
- Distribution, Transportation, In-Transit Visibility
- Analytics and Decision Support
- Logistics IT Infrastructure

Military Command and Control (C2) Systems Information and Decision Superiority

- Designing Solutions to Support the Mission
- Interoperability
- Built to Operate in a Tactical Environment
- Secure Design
- On-the-Move Solutions

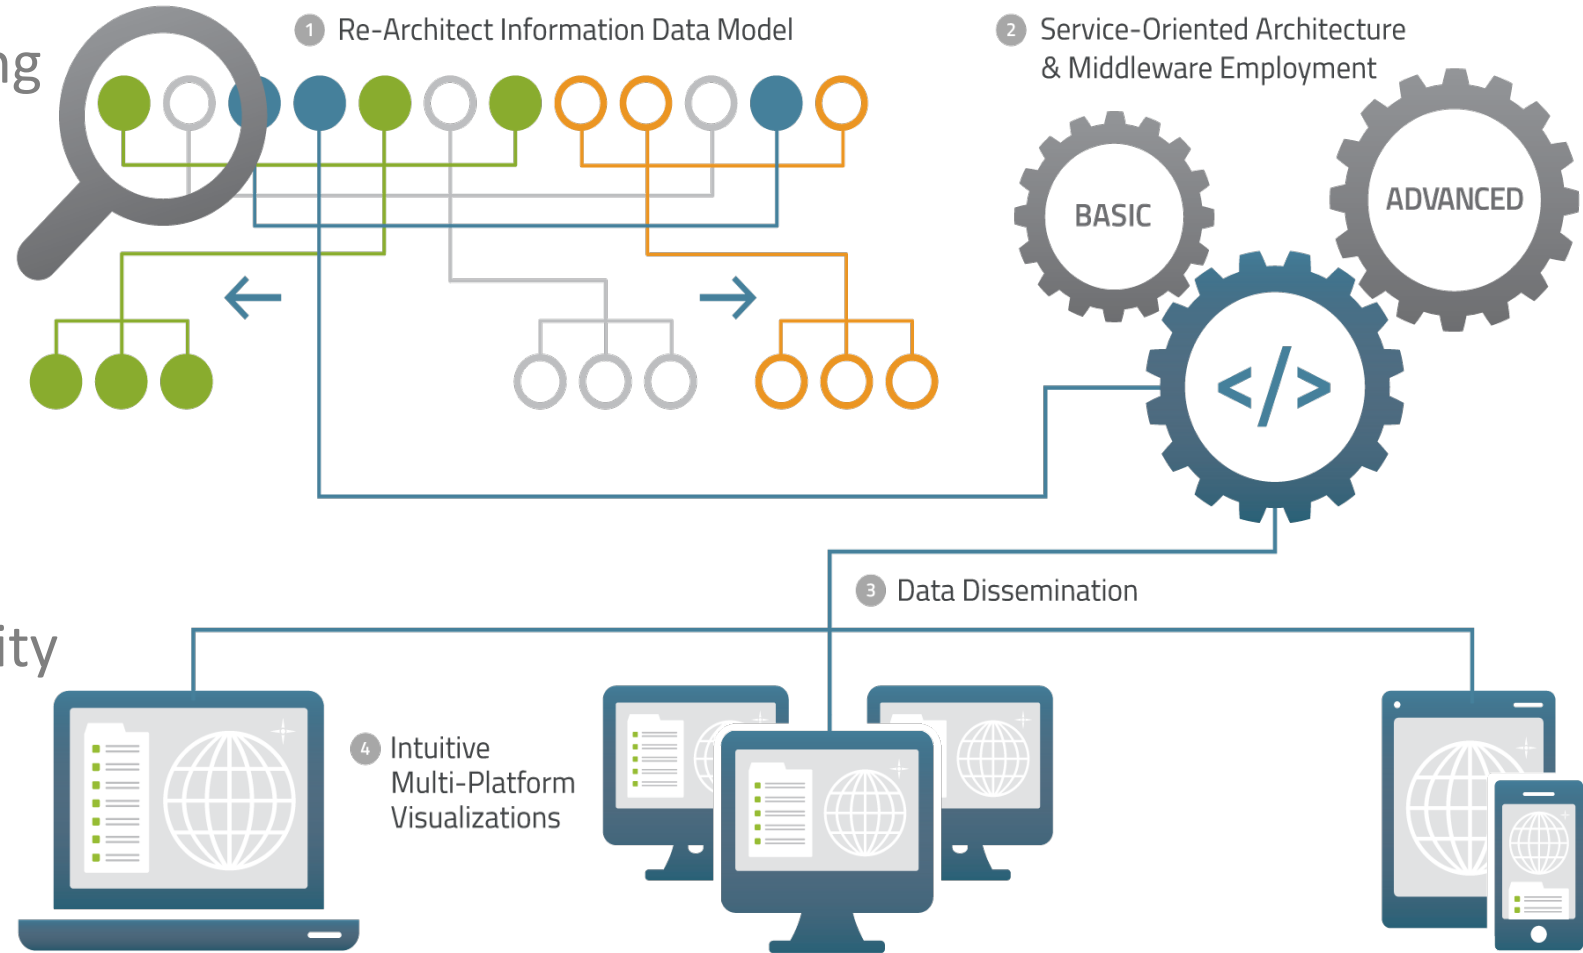

Services: Systems Modernization

Extending System Lifespan Through Modern Architecture

Established track record of migrating legacy systems to scalable, open source, service-oriented solutions.

BENEFITS

- ✓ Extends System Lifespan
- ✓ Reduces Maintenance Cost
- ✓ Improves User Experience
- ✓ Enhances Flexibility and Scalability
- ✓ Improves Information Accuracy
- ✓ Increases Supportability
- ✓ Expanded System Capabilities
- ✓ Improved Overall Value

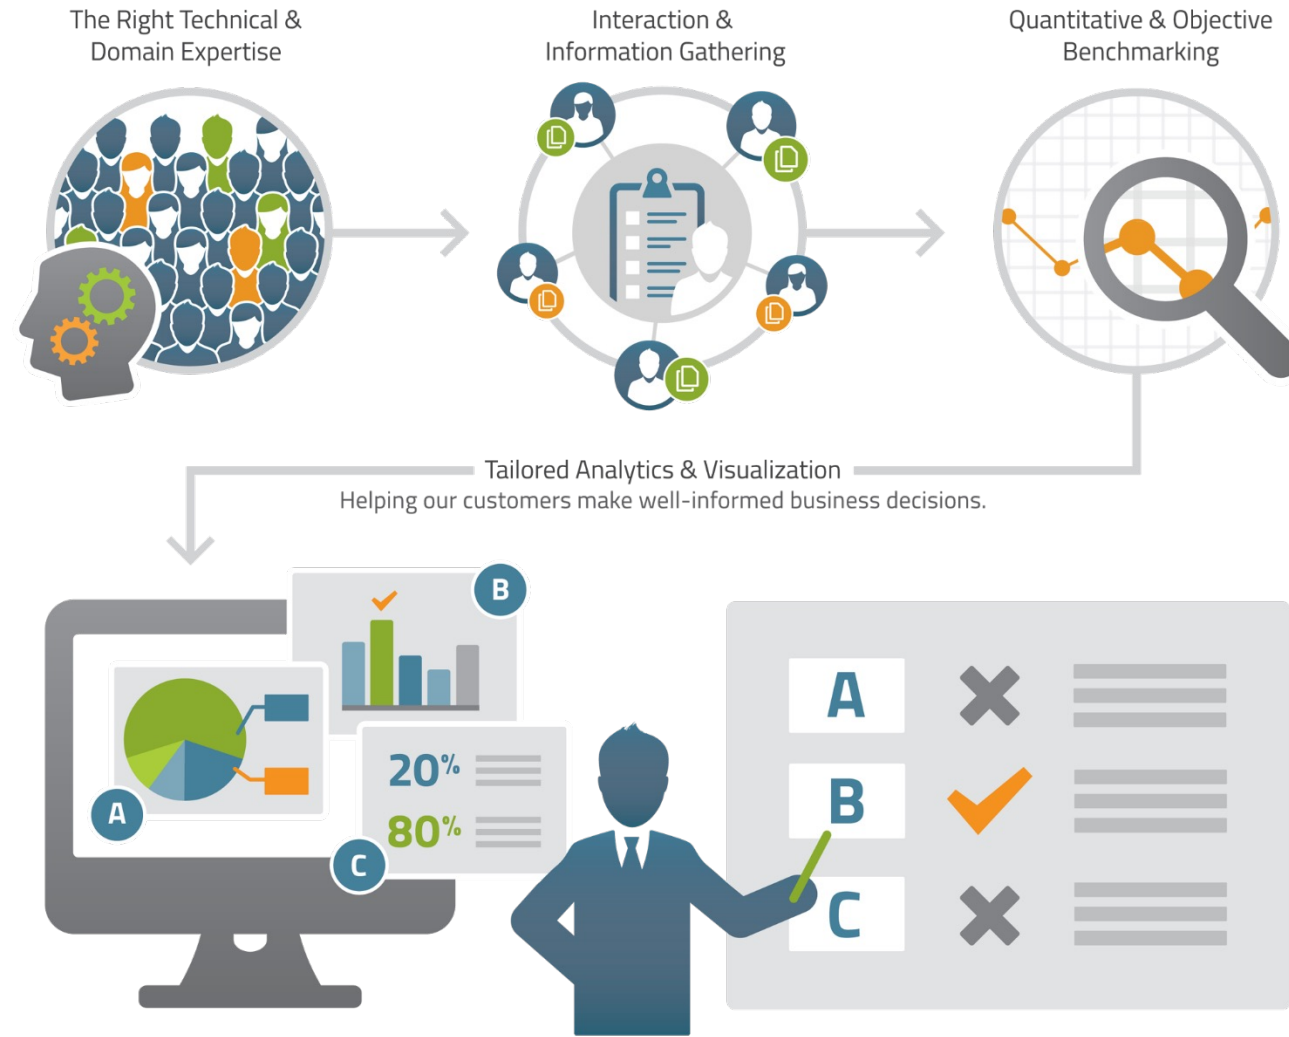

Services: IT Portfolio Management

Intuitive, Quantitative Assessment for Informed Decisions

We help organizations evaluate their IT Portfolio, eliminate antiquated and redundant systems, reduce costs, and increase productivity through optimization.

BENEFITS

- ✓ Comprehensive Visibility of IT Portfolio
- ✓ Informed Investment Decisions
- ✓ Reduced Operating Cost
- ✓ Identification of Redundant, Obsolete, and Low-Value Systems and Activities

Services: Cyber Security

Ensuring Integrity, Confidentiality, and Availability of Data

Tactical Edge designs and implements military-grade, secure software systems for both commercial and government organizations. Additionally, we leverage this experience to provide:

- Certification and Accreditation (C&A)
- Security Audits and Independent Validation Assessments

BENEFITS

- ✓ Infused Security Practices throughout the Entire System Lifecycle
- ✓ Certified Information System Security Professionals (CISSP) with Extensive Experience in Engineering Secure:
 - Complex Distributed Communication Architectures
 - MAC 1 – Command and Control Systems for US Military
- ✓ Proper Implementation and Alignment of Security Tools
