Tactical Edge's Total Visibility Anywhere (TVA) Platform Achieves FedRAMP Authorization

Government-Validated Security Unlocks Fast, Cost-Efficient Access to Premier Logistics Management Solution

San Diego, CA – April 15, 2025 — Tactical Edge, a leader in advanced logistics and mission-critical technology solutions, announces that its flagship platform, Total Visibility Anywhere (TVA), has achieved Federal Risk and Authorization Management Program (FedRAMP) authorization. This milestone confirms TVA's compliance with U.S. government cybersecurity standards and enables faster, lower-cost adoption by federal agencies seeking secure, high-performance logistics solutions.

TVA is an advanced logistics management solution that provides end-to-end management and monitoring of assets across the entire supply chain—from warehouse operations to in-transit shipment tracking—even in high-risk and global operational environments. With FedRAMP authorization, TVA is now pre-approved for deployment across federal networks, dramatically accelerating acquisition timelines and opening the door to broader adoption across defense, intelligence, and civilian agencies.

For government agencies, TVA's FedRAMP status delivers fast, affordable access to high-performance logistics technology:

- **Faster Access to Proven Technology** – Agencies can now rapidly implement TVA without undergoing lengthy security assessments, enabling quicker alignment with mission needs.
- **Cost Savings** – By reducing the total cost of ownership and eliminating redundant review processes, TVA helps agencies deploy best-in-class capabilities at a lower overall cost.
- **High-Capability Performance** – TVA boosts productivity and reduces costs by streamlining workflows, automating tracking and reporting, and providing real-time insights for faster, data-driven decisions.

"We are incredibly proud to announce that TVA has received FedRAMP authorization," said **John Goodman, CEO of Tactical Edge**. "This accomplishment is a testament to the strength of our technology, the dedication of our engineering team, and our unwavering focus on delivering secure, scalable solutions that empower mission success. TVA's FedRAMP status not only validates the trust our clients place in us, but it offers federal partners a fast, affordable path to mission-critical logistics capabilities."

FedRAMP is a U.S. government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. Tactical Edge underwent a comprehensive cybersecurity review and evaluation of TVA's system

architecture and operational infrastructure to ensure the integrity of the system. Additionally, Tactical Edge demonstrated compliance with hundreds of cybersecurity controls and requirements spanning the full systems lifecycle, to earn this designation.

"We're excited to work with federal agencies looking to deploy capability—not manage development projects," added Goodman. "TVA allows these organizations to enhance their supply chain operations immediately, leveraging proven and secure technology without long ramp-up periods."

With FedRAMP authorization, federal agencies can now leverage TVA as a ready-to-deploy logistics solution built to enhance visibility, agility, and data-driven decision-making support.
